SUMMARY

Product Designer with 3+ years designing AI-powered enterprise B2B SaaS in cybersecurity, from user research and information architecture through interaction design, high-fidelity UI, and developer handoff. First product designer at two companies. Solo design lead on the AI-native rebuild of a 10-year-old security platform serving **100+ enterprise clients**, now in beta with 10 clients migrated: admin engagement up **48%**, report adoption up **32%**, escalations down roughly **20%**. Specialize in human-in-the-loop AI, deciding where automation acts and where humans approve.

SKILLS

Product and UX: Product Design, User-Centered Design, Product Strategy, User Research, Usability Testing, Journey Mapping, Information Architecture, User Flows, Interaction Design, Heuristic Evaluation, UX Writing, Cross-Functional Collaboration, Design QA, Design Documentation

UI and Design Systems: Design Systems, Component Library, Design Tokens, Auto Layout, Variables, Wireframing, Prototyping, Interactive Prototypes, Responsive Design, Micro-interactions, Accessibility (WCAG), Developer Handoff

AI and Domain Expertise: AI-Powered Experiences, Human-AI Interaction, Human-in-the-Loop Workflows, Conversational UI and AI Chatbot Design, Gamification, Enterprise SaaS, B2B SaaS, Cybersecurity, Human Risk Management, Phishing Simulation, Analytics and Reporting Dashboards, Data Visualization, User Adoption, HRMS, LMS

Tools: Figma, Cursor, Claude and Claude Code, ChatGPT, NotebookLM, Jira, Notion

WORK EXPERIENCE

Product Designer

Infosec Ventures, Gurgaon, India

Aug 2024 - Present

- Own end-to-end product design for Human Firewall 3 (HF3), the AI-native rebuild of a 10-year-old human risk management platform, covering user research, information architecture, user flows, interactive prototypes, high-fidelity UI, and developer handoff with 1 product manager and 8 engineers. HF3 is now in beta with 10 enterprise clients migrated and feature and bug escalations down roughly **20%**.
- Designed AI-assisted phishing simulation campaign creation with a human approval layer: automation prepares the campaign and admins approve before launch, cutting launch time from **hours to minutes** without giving up admin authority over what goes out.
- Rebuilt risk scoring from a single opaque number into vCRO (Virtual Cyber Risk Officer), a multi-factor radar across Behavior, Training, and Role Sensitivity, then redesigned the admin dashboard around action hotspots using data visualization. Admin engagement rose **48%** across all 10 migrated clients.
- Redesigned the reporting layer, lifting customer report adoption by **32%**. Designed a gamification model that keeps individual failure private and rewards positive behavior, plus a flashcard micro-learning builder that ships training to any LMS.
- Built and maintained the HF3 design system, including a component library, design tokens, and auto layout and variables in Figma, with documentation and design QA alongside engineering through implementation.
- Owned design for eCrime Hub (ecrimehub.gov.ae), a public cybercrime reporting platform for Dubai Police, including its conversational reporting chatbot. The site drew **50,000+** visitors in week one, and **10,200** people started a report through the chatbot in its first months.

UX Designer

TexlaCulture, Gurgaon, India

Mar 2023 - Jun 2024

- As founding designer, designed the first end-to-end version of an HRMS spanning onboarding, hiring, attendance, LMS, and performance, used by **8,000+** employees across 12 enterprise clients in year one.
- Simplified a complex enterprise workflow by restructuring navigation across 4 sections and 40+ modules into a mode-based information architecture (Employee, HR, Admin) with pinning and search.
- Built the design system from scratch across web and mobile, with a reusable component library and developer handoff documentation as the single source of truth. Reworked onboarding and in-product guidance, increasing completion rates by **52%**.

PROJECTS

unsaid - Solo Designer and Builder

unsaidnow.vercel.app | Next.js, Supabase

- Designed and shipped a live side project solo: concept, UX, interaction design, and UI in Claude Design, then built and deployed with Claude Code.

EDUCATION

University of Delhi, Delhi, India

Bachelor of Arts (Honours), English

Jun 2020 - Jun 2023

CERTIFICATIONS

Google UX Design Specialization, Coursera, Feb 2023
