PRODUCT NARRATIVE

Product Designer with 3+ years of experience designing complex enterprise SaaS products across cybersecurity and HRMS domains. Experienced in simplifying high-complexity systems through strong UX architecture, analytical thinking, and system-level design.

FLAGSHIP WINS

- Led end-to-end UX and product flow design for an enterprise Human Firewall platform, covering phishing campaigns, security training (LMS), and multi-channel attack simulations.
- Designed clear, scalable user flows across complex security modules, helping engineering teams build features faster and more consistently
- Added GenAI support to campaign setup, reporting, and risk analysis flows to reduce manual admin work
- Designed admin dashboards and reports that made human risk data easier to understand and act on, contributing to a 48% increase in admin engagement

EXPERIENCE

Infosec Ventures — Product Designer

Jul 2024 – Present | Web-Based B2B SaaS Used By Enterprise Security Teams

- Owned end-to-end UX and product definition for multiple cybersecurity platforms, partnering with product and engineering to decide what to build and how it should function
- Led UX architecture for a Human Firewall platform spanning phishing campaigns, security training (LMS), and multi-channel social engineering simulations
- Integrated GenAI capabilities into core workflows to reduce manual admin effort and accelerate campaign setup, reporting, and risk analysis
- Designed enterprise dashboards and analytics frameworks, resulting in a 48% increase in admin engagement

TexlaCulture — Product Designer

Mar 2023 – Jun 2024 | HRMS SaaS

- Led UX design across the HRMS suite (onboarding, attendance, leave, hiring, LMS, performance, payroll), simplifying complex enterprise workflows into intuitive user journeys
- Designed analytics, reports, and dashboards for each HR module, improving data accessibility and interpretability for HR admins and managers
- Redesigned hiring workflows and candidate progression flows, contributing to a 37% improvement in funnel completion during post-release rollout
- Simplified employee onboarding flows and system guidance, contributing to a 52% increase in successful onboarding completions in early adoption phases

AI-ENABLED PRODUCT EXECUTION

- Defined feature behavior and UX flows with product and engineering before development
- Used Cursor and AI tools to create functional UX logic and reduce engineering rework
- Applied AI selectively to reduce manual effort while maintaining admin control in security workflows

SKILLS

Product & Strategy: UX Problem Solving, Roadmapping, Prioritisation, Stakeholder Alignment, Analytical Thinking & Data Interpretation, Iterative Validation & Feedback Loops

Design & Execution: Interaction Design, Information Architecture, Secure UX, Accessibility, Usability Testing, Design Systems

AI & Tools: **Cursor AI:** Perplexity, NotebookLM, Notion, ChatGPT, Figma, Jira

EDUCATION

University of Delhi — B.A. (Hons) English

Coursera — Google UX Design Specialisation
