SUMMARY

Product and UX designer with 3+ years building B2B SaaS as the founding designer at two companies (Infosec Ventures and TexlaCulture). I turn admin-heavy enterprise workflows into self-serve systems, design AI-assisted flows for production, and own design end-to-end alongside PM and engineering. Solo design lead on the AI-native redesign of a 10-year-old security platform used by 100+ enterprise clients globally, including UAE government.

EXPERIENCE

Infosec Ventures

Jul 2024 – Present

Product Designer · Gurgaon, India (Remote-friendly)

First product designer at Infosec, driving the AI-native redesign end-to-end — from research and IA to interaction design and design systems — alongside 1 PM and 8 engineers.

- Led end-to-end design of Human Firewall 3, a risk intelligence platform; now in beta with 10 enterprise clients migrated from HF2, with new-feature and bug-report escalations down ~20% on onboarded customers.
- Designed an AI-assisted campaign creation flow with deliberate human checkpoints (automation prepares, admins approve), cutting campaign launch time from hours to minutes.
- Redesigned the risk score from a single number into a structured radar across Behavior, Training, and Role Sensitivity, giving admins a reason and a place to intervene; rebuilt the admin dashboard around action hotspots and lifted admin engagement by 48% (measured before and after across all 10 migrated clients).
- Redesigned the reporting layer in HF3, lifting customer-side report adoption by 32% (measured via portal downloads across migrated clients).
- Owned design for eCrime Hub, a public-facing cybercrime reporting platform for Dubai Police; post-launch reach included 50k+ visitors in week one and 3k+ chatbot users in month one.

TexlaCulture

Mar 2023 – Jun 2024

UX Designer · Gurgaon, India

Founding designer on an HRMS used by 8,000+ employees across 12 enterprise clients in year one.

- Designed the first end-to-end version of TexlaCulture's HRMS across onboarding, hiring, attendance, LMS, and performance; restructured a 4-section, 40+ module navigation into a mode-based system (Employee, HR, Admin) with pinning and search.
- Set up the design system from scratch spanning web and mobile, handed to engineering as the source of truth; reworked the onboarding journey and in-product guidance, increasing completion rates by 52% (across year-one enterprise clients).

SKILLS

Design Interaction design, information architecture, design systems, prototyping, usability testing, accessibility, problem framing, prioritization, research synthesis

Tools Figma, Cursor, Claude, ChatGPT, NotebookLM, Jira, Notion

Domains Cybersecurity (phishing simulation, security awareness training, risk scoring), HR Tech (HRMS, onboarding, LMS, performance), Public Sector / Government, Enterprise B2B SaaS, AI-augmented workflows

EDUCATION

University of Delhi — B.A. (Hons) English

Jun 2020 – Jun 2023

Coursera — Google UX Design Specialization

Nov 2022 – Feb 2023
