PRODUCT DESIGNER | UX & AI-DRIVEN EXPERIENCES

Product Designer with 3+ years of experience designing complex B2B SaaS products across cybersecurity and HR systems. Specialized in simplifying high-complexity workflows into intuitive, scalable experiences. Strong focus on end-to-end product design, AI-assisted workflows, and translating data into actionable user outcomes. Experienced in collaborating with product, engineering, and stakeholders to take products from concept to launch.

SELECTED WORK & IMPACT

- Led end-to-end UX design for a Human Firewall platform, covering phishing simulations, security training, and risk analysis
- Translated complex security workflows into structured, scalable product flows, improving clarity for engineering execution
- Introduced GenAI-assisted workflows in campaign setup and reporting, reducing manual effort for administrators
- Redesigned dashboards to surface actionable insights, contributing to a 48% increase in admin engagement

EXPERIENCE

Infosec Ventures — Product Designer

Jul 2024 – Present | Web-Based B2B SaaS Used By Enterprise Security Teams

- Owned end-to-end design execution, from problem definition to high-fidelity UI and delivery
- Designed the Human Firewall platform by integrating phishing simulations, LMS training, and risk reporting into a unified experience
- Partnered closely with product and engineering to define feature behavior, system logic, and user flows
- Applied AI-assisted design approaches to improve efficiency in campaign creation and reporting workflows
- Designed data-driven dashboards focused on decision-making, increasing engagement by 48%
- Created prototypes to validate concepts and communicate design intent across teams

TexlaCulture — Product Designer

Mar 2023 – Jun 2024 | HRMS SaaS

- Led UX design across multiple modules including onboarding, hiring, attendance, LMS, and performance management
- Simplified complex HR workflows into intuitive experiences for admins and employees
- Improved onboarding journeys and system guidance, increasing completion rates by 52%
- Designed reporting and analytics interfaces to enhance data comprehension and decision-making
- Conducted usability improvements based on qualitative and quantitative insights

AI-ENABLED PRODUCT EXECUTION

- Defined product flows and interaction models before development in collaboration with cross-functional teams
- Leveraged AI tools for research synthesis, ideation, and prototyping, reducing iteration cycles
- Integrated AI thoughtfully into product experiences to enhance efficiency while maintaining user control

SKILLS

Product & Strategy: UX problem solving, product flows, prioritization, stakeholder collaboration, analytical thinking

Design & Execution: Interaction design, information architecture, usability testing, prototyping (low to high fidelity), accessibility, design systems

AI & Tools: **Cursor AI:** Figma, Cursor, ChatGPT, Perplexity, Claude, NotebookLM, Lovable, Jira, Notion

EDUCATION

University of Delhi — B.A. (Hons) English

Jun 2020 – Jun 2023

Coursera — Google UX Design Specialisation

Nov 2023 – Feb 2023
